hey@haider.dev  
github.com/haideralsh

Montreal, Canada

A Software Developer with a demonstrated history of contributing to all levels of the stack. Focusing on UI engineering, UX design, and design systems. Skilled in designing, building, and testing performant, accessible, and delightful UIs.

## EXPERIENCE

### **Nulogy** • Remote

*Software Developer*, July 2021 – Present

- Spearheaded effort to migrate six-year old React codebase to TypeScript
- Contributed to a design system used across all organization's products: <https://nulogy.design>
- Sped up developers workflow and CI/CD pipeline by reducing Webpack build time by 300%
- Put in place a Storybook based UI test suite using Chromatic
- Organized workshops for TypeScript and React best practices

### **mdf commerce** • Longueuil, QC

*Software Developer*, March 2019 – June 2021

- Created web frontend of 2 supply chain management applications using React & TypeScript
- Built, maintained, and tested highly available, cloud-based, serverless microservices using Node.js and Go capable of processing and storing over a million EDI transactions per day
- Automated tagging and deployment to a CI/CD pipeline by creating a CLI tool
- Load tested the application's architecture by creating transactions provisioning CLI tool
- Provisioned and deployed infrastructure to AWS using Terraform

*Front-end Developer*, May 2017 – March 2019

- Created responsive and reusable page layouts and components that scale across new supply chain management web applications

*Web Developer Intern*, February 2017 – May 2017

- Used Jira's REST APIs to create internal tool used by project managers to follow up on projects

## EDUCATION

### **Champlain College** • Saint-Lambert, QC

*Diploma of College Studies in Computer Science*, 2013 – 2017
